Product:

Coated Stainless Steel

Location:

Boston, MA

The Millennium South Block canopy presented several challenges to Weiss craftsmen. It was to be constructed with many angles and triangular shaped pieces yet mold flawlessly around bubble skylights. In addition, fittings and covers for lights had to fit into the circular, arched recesses. As always, the architect was looking for minimal exposed seams, and where seams did appear, they

had to create a visual line which was attractive and worked with the structure.

Weiss craftsmen were pleased to have this terrific opportunity to showcase their capabilities. In this project, they worked with coated stainless so the finish will maintain the glossy appearance through many harsh New England winters.
