

Weiss Sheet Metal holds Glass Art Firmly and Attractively

Stainless accents wrap around elevator enclosures and grasp large sheets of glass for a beautiful lobby entrance

When the design called for large sheets of imported glass to light up a lobby area, Weiss Sheet Metal was called in to fabricate the structural support and framing. Each piece of glass was fitted with a frame which was then held in place with removable supports. The resulting stainless trim is an attractive frame for the art glass. It holds it securely without overwhelming the glass texture and color.
