

Metal Trim & Panel Detail Accentuate Hilton Hotel Entrance and Rooftop

***A multi-story column of glass is given
a visual base of stainless steel and
an open steel "Capital" by Weiss***

For Boston's Back Bay Hilton, Weiss Sheet Metal, Inc. was asked to fabricate panels in 1/8" heavy gauge stainless steel. These panels were used on the top penthouse floors as a steel accent and to give added dimension to the lower 8 floors.

Utilizing standard #4, 304 stainless steel, they fabricated the segmented panels to specifications requested by the glazing contractor, but also had to work with the sign maker. Weiss manufactured the sign panel in aluminum, per their specifications, and then created a matching column cover for the final entrance.

Weiss custom fabrication capabilities and knowledgeable craftsmen, allow the work to flow seamlessly from one job requirement to another.
