

Custom Built Cabinets and Trim Compliment Stainless Appliances

Stainless Cabinetry surrounds the range and fits above the stainless oven and refrigerator units in this contemporary kitchen.

Custom stainless cabinets are fronted with a fluted glass for a stylish, open look. Matching trim behind the range and the hood create a uniform stainless, eye-level band on both sides of the kitchen.

Cabinet doors can be hollow stainless panels in construction, or glazed with glass, polycarbonate, or other clear or opaque material. The stainless doors feature double pan construction resulting in a doubled sided, very strong and stable door. Fully adjustable shelving is found behind the doors as well.

Weiss also fabricated the stainless commercial grade duct work and exhaust system which led to the roof for proper ventilation of the stove. They work with both 304 and 316 stainless steel and have the ability to fabricate with #4 satin, #6 and the #8 mirror stainless.
